

## About Me

Curious and quality-driven, I focus on solving meaningful problems and building solutions that are clear, reliable, and practical.

## Experience Horizon

- Form-Driven & Data-Intensive React UIs
- Reusable Component Libraries
- Compliance-Aware & Quality-Critical UIs
- Production-Grade, Tested Frontends
- Dashboard & Workflow-Oriented UIs

## Skills

### Frontend Development & UI:

- React (functional components, hooks)
- TypeScript, JavaScript (ES6+)
- Form handling & validation (Zod)
- Routing (React Router / TanStack)
- Material UI (MUI), CSS / SCSS
- Theming, Design systems
- Design-to-code (Figma → components)

### Architecture & Data:

- State: Redux, Zustand, MobX
- REST APIs, Axios, async patterns
- Monorepo (pnpm, Turborepo)

### Quality & Workflow:

- Vitest, Playwright, React Testing Library
- Git, Azure DevOps
- ESLint, Prettier,
- Agile / Scrum

## Languages

- English - C1 (IELTS 7.5)
- German - A2 (Actively learning)

## Core Values

- Quality-focused
- Reliable ownership
- Adaptable
- Continuous Learner
- Collaborative team player

## Achievements

University Rank Holder (9th Rank, B.Tech IT)

## Experience Certificates

[Certificates - Reference Letter](#)

# Angel Anna Roby

Frontend Developer (React & TypeScript)

Contact: [robbyangelanna@gmail.com](mailto:robbyangelanna@gmail.com) | (+49) 15217301646

Address: Kaiserslautern, Germany

LinkedIn: [LinkedIn/angelannaroby](#)

Frontend Developer with hands-on experience building and maintaining production-grade React and TypeScript web applications. Focused on reusable UI components and patterns, data and interaction-driven interfaces, and maintainable codebases, with a strong emphasis on quality practices and automated testing. Currently completing an M.Sc. in Computer Science and open to relocation across Europe.

## PROFESSIONAL EXPERIENCE

- Working Student – Development Engineer (Frontend)** (December 2022 – Present)  
*osapiens Services GmbH* | Mannheim, Germany
  - Developed React + TypeScript frontend features for compliance-critical, regulated domains, building data-driven, form-heavy, workflow-oriented user interfaces.
  - Translated Figma designs into scalable, theme-aware component libraries and design-system-driven UIs reused across 4 enterprise platforms.
  - Developed shared UI components, types, and utilities within a **pnpm/Turborepo monorepo**, improving scalable code reuse across applications.
  - Implemented state management (**MobX, Zustand**), REST API integration, complex forms and validation, conditional rendering, and internationalization.
  - Maintained frontend quality through automated **unit and end-to-end (E2E) testing** (Vitest, Playwright, React Testing Library), ESLint, Prettier and debugging across pre-release environments.
  - Collaborated in **Agile/Scrum**, participating in code reviews, requirement discussions, UI refinements, and iterative delivery within **Azure DevOps** CI/CD pipelines.
- Software Engineer** (September 2021 – July 2022)  
*Kimball Electronics (India) Pvt. Ltd.* | Trivandrum, India
  - Delivered React dashboards and data visualizations for production monitoring system; built real-time anomaly detection views with chart-based analytics supporting operational decision-making.
  - Designed and implemented **reusable, responsive UI** components using Material UI and component-based architecture, improving maintainability and consistency across monitoring workflows.
  - REST API integration** using Axios; asynchronous data handling, validation, and error states; Agile/Scrum delivery using **Git**-based workflows and iterative feature development
- Developer Analyst** (October 2019 – August 2021)  
*UL Technology Solutions (P) Ltd* | Calicut, India
  - Delivered **end-to-end frontend features** using React (class components) for a government-facing web portal, taking ownership from **UI design** and implementation through testing, debugging, deployment, and post-release maintenance in a small, cross-functional team.
  - Handled **data-centric and GIS-enabled frontend** requirements, including writing SQL queries, maintaining data consistency, and performing data cleanup, while building interfaces with map interaction, location-based selection, and contextual data visualization, in close collaboration with backend developers.
  - Implemented core application logic and UI architecture, including REST API integration (Axios), **Redux**-based state management, and responsive UI development using **Bootstrap**, **HTML**, and **CSS**.

## EDUCATION

- MSc. in Computer Science | Software Engineering** (Oct 2022 – Present, Thesis in Progress)  
*Rhineland-Palatinate Technical University, Germany*
- Bachelor of Technology (B.Tech) in Information Technology** (July 2015 – May 2019)  
*APJ Abdul Kalam Technological University, Kerala, India*  
CGPA: 8.67/10 | Grade: 1.7

## PROJECTS

- osapiens Enterprise Platforms (BrandOS, FTrace, Traceability, ORCA Medical Devices)**  
Enterprise-scale compliance and sustainability platforms with complex, form-driven workflows, shared UI systems and component libraries, monorepo-based code reuse, Webpack/Vite-based build setups, and quality-critical release requirements in regulated domains.
- EMTab – Production Monitoring System (Kimball Electronics)**  
Real-time manufacturing monitoring system featuring operational dashboards, anomaly detection views, and data-heavy visualizations supporting day-to-day production decisions.
- IPMS – Intelligent Property Management System (UL Technology Solutions)**  
Government-facing property management portal combining GIS-based map interaction with record-centric workflows, role-based access, and large-scale public-sector data handling.
